WELCOME TO TURIROA

What a difference a year makes with beef, lamb, mutton and even wool prices improving dramatically with beef and lamb in particular at record levels. With a worldwide shortage of protein lets hope these prices stay around for a few years at least. Not to mention a cracking autumn for most of us with regular rain and warm growing conditions it sure is nice to have some positive news going forward.

The 2025 sale was one out of the box. With a huge crowd and record registrations we were thrilled to get a full clearance and sell seven bulls to stud with a top of \$40,000 to Pine Park Angus. It was a record sale average for us of \$16,898.00 and we certainly realise that bulls are a significant investment. A huge thankyou to purchasers, agents and underbidders who helped to make the day a success.

We are excited to say that this year we will be first up on Sunday 21st of June at 10am. Having been the last sale for 80 odd years we decided it was time for a change. We will present 60 bulls with that deep, grunty look about them with quality right through the catalogue and are very pleased with the evenness of the line up.

It is very pleasing to see our genetics performing so well in Australia with Turiroa Hank 20R439 sons selling to \$40,500 and having the leading sire average of \$14,500 at Mordallup Angus in WA. These bulls were only 12months of age at the time of sale. We will have a good number of Hank sons next year! Also, Turiroa Complete 18P250 sons sold well recently at Jade Park Angus in North East Victoria. Complete will also have more sons here next year.

As we do every year the cow herd is heavily scrutinised with this year seeing the introduction of hip height and body condition score recording with EBV's on this following soon. Our motto of "cows that stay and steers that pay" is always

at the forefront of our decision making. With weaners making up to \$7-8 a kg, a 20-30 kg lift in your weaning weight is \$150-200 a head at 6-8 months of age. Let along capturing value later in the animal's life. This is a significant profit driver on farm!

All calves born at Turiroa are HD50K tested for genomically enhanced EBV's. This is a costly investment, but we are committed to providing you with the most up to date technology mixed with a bit of good old fashioned stockmanship.

This year's lineup have been run in mobs of 35 up until March. We are committed to presenting the bulls in good forward order without being overdone. We are really pleased with this year's lineup and how the bulls have been progressing. We have really targeted that deep, thick, easy-doing type and we are really starting to see it coming through now.

We have another very good lineup of "Avenger" sons with up to 18 catalogued. The Avengers were hugely sought after last year and this year's sons are looking just as promising. They can't be beaten for natural thickness, width, consistency and excellent breed type. We have used four sons in the stud to carry on this excellent bloodline. The females are deep, wide and moderate framed and set to have a big influence on our herd in years to come.

First sons of Turiroa Trooper 22T681 who was used as a yearling will impress for size and growth yet still retaining the deep middle and width of loin we strive for.

Old campaigners Kaharau Furnace and Turiroa Nitro have their last crop of sons on offer and we have a few Turiroa Completes and Black Ridge R50 sons that will catch the eye.

Two new Aussie bulls will make an appearance with MM Rembrandt R48 (sold for \$240,000) and

MM Rector R53. A sampling of sons this year with more to come in the future. These two bulls have left the type we require and kicked our carcass data along. It's a never-ending challenge trying to find bulls that tick our boxes for phenotype and structural soundness while having carcass data at the same time.

It's great to get feedback that the bulls are performing out in the paddocks for a good number of years and the progeny are so even in type and hit the scales hard.

Videos of the sale bulls will be on the Turiroa Angus website by the end of May.

To offer flexibility to our clients we will again be incorporating BIDR into our on farm sale, allowing those who cannot make the sale to view and bid on line. However, we still recommend viewing the bulls prior to the sale.

With over 80 years of breeding behind us over this time our breeding philosophies have remained the same: to produce sound, functional, fertile and maternal cattle with constitution and excellent breed type. These cattle must have the ability to leave top class off-spring that can hit target markets and weights sooner. Our cow herd is the measuring parameter for do-ability, survivability and longevity. They also measure temperament, udder quality and feed efficiency. The top profit drivers for beef cattle enterprises that you can control to MAXIMISE the amount of beef produced on your property therefore adding VALUE along the way not just at slaughter are:

- Stocking rate
- Pregnancy test rate
- Weaning rate
- Weaning weight
- Growth Rates

Our cattle have been selected for large scrotal size, produce vigorous calves that grow fast and dams that have superior udder and milking ability for generations. All Turiroa heifers are mated as yearlings.

We are excited to present this year's team of very even, powerful sale bulls. We have not chased breeding fads or latest trends, instead using eye appraisal and stockmanship first then incorporating this with the raft of EBVs we have available today.

Sale Bulls are grass fed. We do not feed crops to any of our cattle. All bulls in this catalogue have been vet tested for penile soundness, palpated and morphology tested, BVD tested and vaccinated, 10 in1 vaccinated twice and are AMF, NHF, CAF and DDF pedigree free or tested free, TB status C10 and of course backed by our THREE year guarantee.

We are available anytime to discuss your bull requirements or let us know if you would like to come and view the bulls prior to the sale. Please get in touch if you would like help with finding accommodation in Wairoa as there are various BNB's available that we can provide contact details for.

We look forward to catching up on Sunday 21st of June with the new start time of 10am. With viewing from 8.30am. The Webers will be hot and Nolans famous sea food chowder will still be on the menu!

ANDREW AND TRACEY POWDRELL

OVER 80 YEARS STRONG

The stud was founded in 1944 by Walter Powdrell. Walter and his bride Ruth were given five pedigree Angus heifers as a wedding present from RE Jefferson (Ruth's father) who was also a well-known Hereford breeder at the time. Walter developed the stud and it wasn't long before he had an outstanding herd of cows.

The stud was taken over in the late seventies by two of Walters sons Rick and Rowley who grew the stud numbers to cater for an ever-expanding market. In 2000 Rick and wife Olivia took over the stud outright with Olivia doing the stud books for 40

years. They were joined by Andrew at this time who then went on to manage the stud and increase the numbers utilizing ET.

Andrew and wife Tracey took over full control of the stud in 2017 with Turiroa now selling up to 60 bulls at its Annual Rising 2yr Sale and another 25-30 privately. Around 20 lower birth weight yearling bulls are sold in the Spring with surplus heifers being sold in the past to China. All Bulls and heifers are HD50K tested for genomically enhanced EBV's. We are building the herd slowly and carefully to around 300 top quality females.

SIGNIFICANT HIGHLIGHTS

1972 - Turiroa was the first stud in New Zealand to export a bull at auction back to Scotland to the Wedderlie Stud.

Over the years Turiroa has exported cattle to China, Japan, Australia as well as embryos and semen, with semen also being sold to South Africa.

1996 - Highest top price of \$28,000 and average of \$5100 for the stud.

2002 - Turiroa set an Australasian record high on farm sale average at the time of \$9388 with eight stud bulls sold that day.

2012 - Record sale average of \$10,927 with 9 stud bulls sold and a top of \$72,000.

2020 - New Zealand On Farm Record at the time for the highest priced bull for Turiroa Ragnar 18P224 selling for \$104,000. Turiroa Complete 18P250 also selling that day for \$86,000.

2023 - Achieved second highest average sale price in New Zealand of \$12,860.00.

2025 - Record sale average of \$16,898 with 7 bulls going to stud.

REPRODUCTIVE FERTILITY IN HERD BULLS

The most important factor influencing the profitability of a beef cow operation is the percentage of the calf crop weaned. The herd bull influences overall herd fertility more than any other single animal.

Several factors influence a bull's fertility. A bull must be developed properly and have reached puberty to be fertile. Other determinants are social dominance, Libido, good nutrition as well as physical characteristics such as SCROTAL CIRCUMFERENCE and SEMEN QUALITY.

SCROTAL CIRCUMFERENCE.

As scrotal circumference increases, so does the daily production of high quality sperm. There is a positive correlation between a sire's scrotal circumference, the scrotal circumference of his sons and the pregnancy rate of his daughters. Bulls with a larger scrotal circumference are likely to sire sons with large scrotals and his daughters are likely to reach puberty at younger ages and are more likely to be cycling at the beginning of the breeding season and are more likely to become pregnant earlier when compared with the off-spring of bulls with a small scrotal circumference.

All bulls scrotal measurement is an indirect estimate of the mass of testicular tissue, which is directly related to sperm quantity and quality which is a measure of his capacity eg. Bull to cow ratio.

SEMEN QUALITY.

Semen quality is determined by the volume of the ejaculate and by the MOTILITY and MORPHOLOGY of the sperm cells.

Sperm MOTILITY is calculated by evaluating the percentage of spermatozoa with forward movement in a sample ejaculate. Semen MORPHOLOGY is calculated by evaluating the number of normal spermatozoa in a sample ejaculate in relation to sperm with primary and secondary abnormalities. Semen MORPHOLOGY influences pregnancy rates therefore selection of bulls with better quality semen can help increase overall pregnancy rates in a herd.

NOTE: Turiroa has been selecting for large scrotal size for many years and have listed the individual Morphology of each bull catalogued. The standard is 75% or better for Morphology. Most Turiroa Bulls are consistently achieving well over this. Also included is actual scrotal size (taken April 2025) and dams performance by way of calves born , eg 6/6 . (Six calves born from six matings etc.) in a simple easy to read box.

SALE NOTES

PLEASE NOTE:

- Accredited brucellosis and tuberculosis free herds.
- Strictly commercial orientated. Turiroa bulls are not overfed prior to sale.
- Sale bulls AA Inspected and fully guaranteed.
- Performance recorded & carcass scanned.
- Our cattle are freeze branded for easy identification.
- 80 years in the business.
- **SEMEN**- Turiroa retains the right to take up to 200 straws of semen off any bull sold in this catalogue for in herd use only at our cost.
- All calves born at Turiroa are HD50K tested

DELIVERY:

Cartage will be paid by the vendor if uplifted within two weeks of the sale. South Island delivery paid by vendor to Feilding. Bulls may be held under exceptional circumstances by arrangement with vendor.

FERTILITY GUARANTEE

All lots contained within this catalogue are covered by our 3 season warranty with regard to soundness and fertility. In the unlikely event that a bull should develop a fault that affects his ability to breed that is not covered by normal insurance we will refund to the purchaser a proportion of the purchase price depending on the length of service the bull has given. Namely two thirds of the purchase price after one year of service and one third after two years, minus the salvage costs and any semen sales from the bull. To be available as a credit on a replacement bull at the following sale or a suitable replacement offered if available.

Note: The cost of taking delivery or/and the returning a bull to the Vendor shall be borne by the Purchaser. A veterinary certificate will be required by the vendor.

CONDITIONS OF SALE:

The sale will be conducted with the Conditions of Sale of the Wairoa Stock and Station Agents' Association, a copy of which will be exhibited.

OVERSEAS PURCHASERS:

All sales to overseas purchasers are on condition that the cattle pass all necessary tests required for entry into the purchasing country.

INSURANCE:

Insurance is recommended and can be arranged with a representative who will be present on sale day.

PAYMENT:

Due date for payment on all cattle sold at this sale is 14 (fourteen) days from the date of sale.

The following conditions apply:

1. That the purchaser shall throughout the guarantee period give the bull full and sufficient opportunity to prove that he is a good server and stock - getter of, to demonstrate his ability to get stock, whichever the case may be.
2. The Purchaser shall throughout the guarantee period assure that the bull has proper care and attention, and is maintained in good condition and health. Bull not to be disposed of unless for humane reasons.
3. Failure on the part of the purchaser to observe the foregoing conditions or any of them shall render the undertaking void.

BULL FERTILITY SOUNDNESS CHECK

TURIROA ANGUS

On the 7th April 2026, all of the Turiroa Angus bulls on offer were presented for a crush side examination to ensure that no anatomical abnormalities of the reproductive organs were present.

TESTES

The testicles were palpated to ensure the presence of two symmetrical, turgid testes with no lumps or deformities

PENILE SOUNDNESS

Protrusion of the penis was obtained by electrostimulation and the penis and prepuce were inspected for persistent frenulum, signs of disease, damage or deviations

SEMEN EVALUATION

A semen sample was collected and evaluated for progressive motility, morphology and density. All semen was assessed under oil emersion magnification through Eosin/Nigrosin staining with morphology exceeding 75% normal spermatozoa

TRANSTASMAN ANGUS CATTLE EVALUATION EBVS

EBVs and Selection Indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) to provide the best measure of an animals genetic merit.

To ensure the accuracy of EBV and Index data, Angus NZ combine with Angus Australia to create a reference population known as the TransTasman Angus Cattle Evaluation (TACE).

By using TACE – along with visual and structural appraisal – will assist in creating a balanced phenotypical and genotypical breeding outcome.

FOUR STEPS TO SELECTING YOUR NEXT ANGUS NZ SIRE:

1. Consider your individual EBVs of importance
2. Consider other traits of importance (e.g. visual assessment)
3. Identify the **Angus NZ selection** index of most relevance to your breeding programme
4. **Rank animals** using the chosen Selection Index.

Angus NZ publishes the following TACE EBVs and Selection Indexes. Please note that only EBVs from the same TACE analysis can be directly compared.

Growth EBVs	Fertility & Birth EBVs	Carcase EBVs	Other EBVs	Selection Indexes
Birth Weight	Scrotal Size	Carcase Weight	Dociility	Self Replacing
200 Day Growth	Days to Calving	Eye Muscle Area	Structural Assessment	AngusPure
400 Day Weight	Gestation Length	Rib Fat		Heifer Dairy Terminal
600 Day Weight	Calving Ease Direct	Rump Fat		<i>Details about the Angus Selection indexes can be found at:</i> breedplan.une.edu.au/media/bqjbnnbh/using-new-zealand-angus-selection-indexes.pdf
Milk (Maternal)	Calving Ease Daughters	Retail Beef Yield		
Mature Cow Weight		Intramuscular Fat		
	<i>For more information, including EBV descriptions and how to use them go to: breedplan.une.edu.au/media/dtqpdm34/using-and-understanding-breedplan-ebvs.pdf</i>			

Beef & Lamb Genetics have developed a new tool to make it easier to find the best bulls for your farming operation. Using a series of buttons and sliders, you can refine down your breeding criteria. On a click of a button, nProve then generates a list of bulls that best fit that criteria. It's free to use, there's no need to register and there's also helpful tips to get started. Try it out at www.nprove.nz

INDEPENDENTLY INSPECTED

**ALL BULLS IN THIS CATALOGUE HAVE BEEN
 INDEPENDENTLY INSPECTED**

This Inspection service is offered by Angus New Zealand to breeding members as a form of quality assurance and indicates that the animal has passed inspection **on the specific day it was viewed**. The inspection is carried out by an approved Angus NZ Inspector, and animals of a minimum age which **pass** this inspections may assume an "Independently Inspected" status and may be promoted under the associated Angus NZ "Independently Inspected / AA Tick" logo (attached).

Inspections are carried out in accordance with the Angus NZ Inspection Manual 2011.

VISUAL APPRAISAL IS VERY IMPORTANT FOR SELECTING BULLS

- **MASCULINE TRAITS** - A strong head, jaw and thick neck indicate high levels of libido, testosterone and reproductive efficiency.
- **NECK LENGTH** - A thick necked animal matures and reaches puberty earlier and has more libido. A longer neck indicates a higher maintenance animal that is slower to reach puberty and rebreed.
- **HEART GIRTH** - Larger heart girth is an indicator of vigor and easy keeping ability. Small heart girth animals are more susceptible to stress, are higher maintenance and do not perform well.
- **STRUCTURAL SOUNDNESS** - Feet and bone - Hill country cattle cover large distances over rugged terrain so a strong skeleton is essential.
- **REPRODUCTIVE** - A tight sheath, good sized and shaped testicles are essential.
- **FLANK** - Deep flanked animals are easier keeping, have more meat in the rump and have more maternal and reproductive efficiency. Higher flanked animals tend to be higher maintenance and take longer to finish on grass.

LOOKING AFTER YOUR NEW BULL

1. Run your bull with a steer or cow as a companion.
2. Handle them quietly and don't rush them
3. Young bulls are still growing, so fresh feed and a little hay will maintain their growth pattern and help them to settle in.
4. Turiroa bulls are accustomed to being handled by Stockmen on horses and motorbikes and with dogs.
5. When the season is finished, the bull should be drenched and put away on good feed. Adequate feed will help stop fighting and help the bulls settle into their groups

O.S.H

Under the Occupation Health and Safety Act 1992 we are required to advise people of possible hazards.

1. **Cattle Movements**
2. **Vehicles and Machinery**
3. **Cattle Yards: Slippery Surface**
4. **Pavilion: Seating**

HERITABILITIES OF TRAITS IN ANGUS GROUP TACE (TRANSTASMAN CATTLE EVALUATION)

Only part of the variation that we observe among animals is due to genetic differences. The majority of the variation is generally due to non-genetic factors such as differences in environment and nutrition.

The degree to which genetic differences influence performance varies from trait to trait. This is explained by differences in the “heritability” of the traits.

Growth and carcass traits tend to have moderate to high heritabilities (i.e. 20 to 60%), whilst maternal traits have low heritabilities (10% or lower).

The TransTasman Angus Cattle Evaluation takes into account the different degrees of heritability of various traits, and the known genetic relationships between the traits.

 The amount of genetic influence in a trait.

 The amount of environmental (non-genetic) influence in a trait.

Avenger has cemented himself as one of the most consistent breeding bulls we have had for some time. At last years record breaking sale his sons were highly sought after with two going to stud, topping at \$38,000 with the rest selling as top end station bulls. We have used four of his sons in the herd and there will be up to eighteen sons catalogued for this years sale from twenty two sons born. Three were sold as yearlings and one died. His daughters are mid framed, super gutsy and will make matrons that stay in the herd.

Just a sample of sons with more to come next year. Rector is a carcass bull we used lightly in the herd. He has magnificent data with virtually no holes on paper. Check out lot 3 who is by Rector out of a 2 yr old heifer! Like most carcass bulls we have to ensure we dont lose other things for the sake of getting numbers on paper but so far we are happy with the outcome.

Just four sons catalogued from a flush we did. Complete has bred well here in NZ and Australia. We purchased "Complete" back as an aged sire and will have more sons by him next year. Complete is a moderate framed bull, with length and depth. Some great old bloodlines in behind him.

Rembrandt has bred very well for us with some very good sons in the sale. His daughters are excellent and we look forward to seeing what they do for us in years to come. Due to a change in semen import protocols no more Rembrandt semen is able to come to NZ and with only a few studs to have used him dont miss an opportunity to secure these genetics. Rembrandt sold for \$240,000 as an 18 mth bull!

To still have sons catalogued in the sale from the 2017 born Nitro is no mean feat! Nitro has been a very solid performer for us with sons selling to \$52,000. He has length, plenty of muscle and is super sound. These are his last sons to be sold.

Used in the stud. A lovely put together Avenger son to kick things off. Tremendous type with width of loin and hindquarter. Rock solid pedigree with Outlier and Highlander on the bottom line. I can see him leaving lovely mid frame daughters and we look forward to seeing his progeny hitting the ground.

Another one that catches the eye. Look at the quality! Good fats and balance throughout here. He carries length but still retains the depth we like to see. Well worth a few ticks.

Very good Nitro son here. Lovely strength from nose to tail. You can't eat the head but it sure does set up the rest of the body. Classic mid framed, deep set type we love to see. Great SS, DTC, EMA and RBV.

A real carcass bull here. You can see the natural soft fleshing in him right through his mid section, loin and well into his hindquarter. If you're wanting to add some easy doing ability to your cow herd then look no further.

Moderate Avenger son with a terrific temperament. Hard to fault on type as are all the Avengers. On his dam's side he traces back to a lovely Rangatira cow we purchased at their dispersal sale who has Braveheart and Thor in her breeding.

PURCHASER: PRICE:

HD50K Tested

The best insurance policy you'll get on your bull this season.

- Allows you as a purchaser to be more confident that **the progeny performance of the bull you purchase will match his figures**
- Increases the accuracy of Angus BREEDPLAN EBVs and indexes for young Angus bulls, with limited or no progeny, daughters, or carcass information
- Increases the accuracy of Angus BREEDPLAN EBVs for time consuming, difficult, expensive and hard-to-measure traits, such as intramuscular fat and eye muscle area

FMG Premier Bull Sale Insurance Form

What is FMG Premier Bull Insurance?

On receiving a completed FMG Premier Bull Sale Insurance form from an existing FMG client, FMG provides insurance cover for bulls including theft, death caused by certain accidents, injury, disease, illness or humane destruction and permanent infertility, provided the bull's purchase price does not exceed \$50,000 +GST. Please contact an FMG representative if you are not an FMG client, or you purchased a bull for over \$50,000+GST.

What is the length of cover?

Your specified bull(s) can be insured for up to 12 months on FMG Premier Bull Sale Insurance.

What are the benefits?

✓ <i>Infertility</i>	Cover if your specified bull has to be intentionally slaughtered due to permanent infertility caused by certain accidents, disease, or illness.
✓ <i>Theft or death</i>	Cover for your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
✓ <i>Vet costs</i>	Cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Apply

Please fill in this form as soon as you have purchased your new bull(s) and hand it to your FMG representative. This form **MUST** be fully completed for Premier Bull Sale Insurance.

BULL-PROOF

YOUR ASSETS AGAINST RURAL THEFT.

Theft and burglaries occur more often than you think, and the number of theft claims is increasing.

Every year FMG supports over 1,000 families impacted by theft and burglary. Alarmingly, 1 in 5 clients at rural addresses have been targeted more than once in the same year!

We think now's the time to put a lock on that trend. We have teamed up with NZ Police to create a Rural Crime Prevention Guide to help prevent theft and burglaries at your rural property – find out more at fmg.co.nz/rural-theft

We're here for the good of the country.
