

Wednesday 28th June 2023 - 2.00pm

Tribute To A Great Stud Master 21/10/47- 28/12/22

We were deeply saddened when Dad (Rick) passed away suddenly on the 28th December 2022. We take some comfort that he was out on a hill checking a mob of Angus cows and calves and he died with his boots on. We will remember dad as a true cattleman! He dedicated his whole working life to the stud (55 yrs) and over the time he has had a hand in breeding some outstanding Sires. He liked his bulls masculine and his cows feminine and like his father before him he took great pride in his females but wouldn't hesitate to cull without emotion.

He could sum up an animal very quickly and often he would say -that bull there will leave lovely females and he was nearly always right. He built up the cow herd over the years and did it often not by purchasing the most expensive bulls but having the ability to pick a potential good breeding bull that could be right down the catalogue order. He had the ability to see potential in a bull and then getting that bull to the right females. He was at home out on the hills. He hated being in the office and was more than happy to leave that side to Olivia who ran the stud books for over 40 years.

He didn't like change too much but to his credit he realised that he would have to eventually embrace EBV's to a certain degree. He also liked the people side of the Angus world and enjoyed chatting to new breeders who often sought his advice. He was always happy to give his opinion. Like any good Stud breeder his cattle were his passion in life. We will miss his input into the stud and chewing the fat about all things Angus and The All Blacks!

RIP

TURIROA ANGUS

www.turiroaangus.co.nz

WELCOME TO TURIROA

With the wettest winter and summer last year it seems nothing has changed as we move through 2023!

Gabrielle hit in February and caused widespread destruction. Our hearts go out to those who have lost loved ones, houses, livelihoods. It's hard to believe the amount of rain that has fallen this past 12 months. Here's hoping on a dry, warm winter.

We were very pleased with the last years sale selling 7 Bulls to other studs, with the top price bull 20R439 selling to Grampians Angus for \$50,000. A lovely deep bodied Latitude son. On the commercial front it was pleasing that there 26 bulls sold under \$10,000 which meant good buying for our commercial clients. We would like to thank purchasers, agents, under bidders for the wonderful support.

This year for the first time we have HD50K a portion of the sale bulls to give more accuracy on their EBV's. We see it as our duty to provide as much accurate data as we can and we will be incorporating it more into our herd in the future.

To offer flexibility to our clients we will again be incorporating BIDR

into our on farm sale, allowing those who cannot make the sale to view and bid on line. However we still recommend viewing the bulls prior to the sale.

This sale will be hosted by bidr® (www.bidr.co.nz) as a HYBRID auction, with online bidding and a live-stream available on sale day, as well as the normal on-farm format. All intending ONLINE purchasers must register on bidr® in advance of the sale date, by visiting the website and using the "sign up" button, adding their contact information and nominating the agency they would like to purchase through and account held with that agency. Alternatively, purchasers can organise an agent from one of the agencies listed on bidr® to buy on their behalf. The bidr® team is contactable on **0800 TO BIDR (0800 86 2437)**, or email enquiries@bidr.co.nz for assistance at any point. Alternatively, contact an area representative:

Sales Coordinator: Olivia Manley-027 348 6354

We have been breeding pedigree Angus Cattle for over 75 years and over this time our breeding philosophies have remained the same- To produce sound , functional, fertile and maternal cattle with constitution and excellent breed type. These cattle must have the ability to leave top class off- spring that can hit target markets and weights sooner. Our cow herd is the measuring parameter for do-ability, survivability and longevity. They also measure temperament, udder quality and feed efficiency. The top profit drivers for beef cattle enterprises that you can control to MAXIMISE the amount of beef produced on your property therefore adding VALUE along the way not just at slaughter are :

- Stocking rate
- Pregnancy test rate
- Weaning rate
- Weaning weight
- Growth Rates

Our cattle have been selected for large scrotal size, produce vigorous calves that grow fast and dams that have superior milking ability for generations.

We are excited to present this years team of big, powerful sale bulls with new sires Turiroa Complete 18P250, Atahua Toughnut 18-378, Brookwood P26 and Shian Ranger 507 really delivering for us. Alongside tried and proven sires Turiroa Nitro 17N122, Taimate Latitude L7 and Turiroa 18P240. The depth right through the catalogue is evident. We have been concentrating on getting that visual hindquarter, width of

loin and our trademark big scrotals for that inbuilt fertility.

Next year we will celebrate 80 years of breeding pedigree Angus cattle and to celebrate we will be holding an elite female sale on April 24th at 2.00pm of around 40 VIC S and T drop females. This will be the first time in our studs 80 yr history that we have opened up the herd and these outstanding young matrons will come from the very heart of our program. These heifers will be in calf to industry leading bulls and will make lovely foundation females or future ET donors . They will be the pick of their age group.

We have not chased breeding fads or latest trends. Instead using eye-appraisal and stockmanship first then incorporating this with the raft of EBVs we have available today.

Sale Bulls are grass fed. We do not feed crops to any of our cattle. All Bulls in this catalogue have been vet tested for penile soundness and morphology, BVD tested and vaccinated, 7 in1 vaccinated twice and are AMF, NHF, CAF and DDF pedigree free or tested free, TB status C10 and of course backed by our THREE year guarantee.

We are available anytime to discuss your bull requirements or let us know if you would like to come and view the bulls prior to the sale.

ANDREW AND TRACEY POWDRELL

REPRODUCTIVE FERTILITY IN HERD BULLS.

The most important factor influencing the profitability of a beef cow operation is the percentage of the calf crop weaned. The herd bull influences overall herd fertility more than any other single animal.

Several factors influence a bull's fertility. A bull must be developed properly and have reached puberty to be fertile. Other determinants are social dominance, Libido, good nutrition as well as physical characteristics such as SCROTAL CIRCUMFERENCE and SEMEN QUALITY.

SCROTAL CIRCUMFERENCE.

As scrotal circumference increases, so does the daily production of high quality sperm. There is a positive correlation between a sire's scrotal circumference, the scrotal circumference of his sons and the pregnancy rate of his daughters. Bulls with a larger scrotal circumference are likely to sire sons with large scrotals and his daughters are likely to reach puberty at younger ages and are more likely to be cycling at the beginning of the breeding season and are more likely to become pregnant earlier when compared with the off-spring of bulls with a small scrotal circumference.

All bulls scrotal measurement is an in - direct estimate of the mass of testicular tissue, which is directly related to sperm quantity and quality which is a measure of his capacity eg. Bull to cow ratio.

SEMEN QUALITY.

Semen quality is determined by the volume of the ejaculate and by the MOTILITY and MORPHOLOGY of the sperm cells.

Sperm MOTILITY is calculated by evaluating the percentage of spermatozoa with forward movement in a sample ejaculate. Semen MORPHOLOGY is calculated by evaluating the number of normal spermatozoa in a sample ejaculate in relation to sperm with primary and secondary abnormalities. Semen MORPHOLOGY influences pregnancy rates therefore selection of bulls with better quality semen can help increase overall pregnancy rates in a herd.

NOTE: Turiroa has been selecting for large scrotal size for many years and have listed the individual Morphology of each bull catalogued. The standard is 75% or better for Morphology. Most Turiroa Bulls are consistently achieving well over this. Also included is actual scrotal size (taken April 2023) and dams performance by way of calves born , eg 6/6 . (Six calves born from six matings etc.) in a simple easy to read box.

BULL FERTILITY EVALUATION

TURIROA ANGUS

The bulls listed in this catalogue have undergone a Fertility Evaluation on the 24th of April 2023 and have exceeded the minimum standards for the following parameters:

PENILE SOUNDNESS

The extended penis shows no signs of injury or abnormality and is structurally sound

SEMEN EVALUATION

A semen sample, collected using an electro-ejaculator, is examined microscopically and assessed for density, motility and exceeds the 75% normal morphology minimum requirement

A handwritten signature in black ink that reads "Helen Taylor". The signature is written in a cursive style with a large, looped initial "H".

PLEASE NOTE:

- Accredited brucellosis and tuberculosis free herds.
- Strictly commercial orientated. Turiroa bulls are not overfed prior to sale.
- Sale bulls AA Inspected and fully guaranteed.
- Performance recorded & carcass scanned.
- Our cattle are freeze branded for easy identification.
- Over **75 years** in the business.
- **SEMEN**- Turiroa retains the right to take up to 200 straws of semen off any bull sold in this catalogue for in herd use only at our cost.

DELIVERY:

Cartage will be paid by the vendor if uplifted within two weeks of the sale. South Island delivery paid by vendor to Feilding. Bulls may be held under exceptional circumstances by arrangement with vendor.

CONDITIONS OF SALE:

The sale will be conducted with the Conditions of Sale of the Wairoa Stock and Station Agents' Association, a copy of which will be exhibited.

OVERSEAS PURCHASERS:

All sales to overseas purchasers are on condition that the cattle pass all necessary tests required for entry into the purchasing country.

INSURANCE:

Transit and Period Insurance are recommended and can be arranged with the Auctioneers.

PAYMENT:

Due date for payment on all cattle sold at this sale is 14 (fourteen) days from the date of sale.

FERTILITY GUARANTEE

All lots contained within this catalogue are covered by our 3 season warranty with regard to soundness and fertility. In the unlikely event that a bull should develop a fault that affects his ability to breed that is not covered by normal insurance we will refund to the purchaser a proportion of the purchase price depending on the length of service the bull has given. Namely two thirds of the purchase price after one year of service and one third after two years, minus the salvage costs and any semen sales from the bull. To be available as a credit on a replacement bull at the following sale or a suitable replacement offered if available.

The following conditions apply:

- 1 That the purchaser shall throughout the guarantee period give the bull full and sufficient opportunity to prove that he is a good server and stock - getter of, to demonstrate his ability to get stock, whichever the case may be.
- 2 The Purchaser shall throughout the guarantee period assure that the bull has proper care and attention, and is maintained in good condition and health. Bull not to be disposed of unless for humane reasons.
- 3 Failure on the part of the purchaser to observe the foregoing conditions or any of them shall render the undertaking void.

The cost of taking delivery or/and the returning a bull to the Vendor shall be borne by the Purchaser. A veterinary certificate will be required by the vendor.

This sale will be hosted by bidr[®] (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr[®] using an account held with one of the bidr[®] partner agencies in advance of the sale date.

The bidr[®] team is available to assist intending purchasers with signing up and registering – please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

TRANSTASMAN ANGUS CATTLE EVALUATION EBVS

TransTasman Angus Cattle Evaluation (TACE) EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. TACE information should always be used in conjunction with other selection criteria, including visual assessment.

A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT ANGUS NEW ZEALAND SIRE

A TACE Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

1. Identify the **Angus New Zealand selection index** of most relevance to you.
2. **Rank animals** using the chosen selection index.
3. Consider the individual EBVs of importance.
4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online here www.angusnz.com.

TRANSTASMAN ANGUS CATTLE EVALUATION

The Angus New Zealand Association publishes the following TACE EBVs and Selection Indexes. Please note that only EBVs from the same TACE analysis can be directly compared.

Growth EBVs	Fertility & Birth EBVs	Carcase EBVs	Other EBVs	Selection Indexes
Birth Weight	Scrotal Size	Carcase Weight	Docility	Self Replacing
200 Day Growth	Days to Calving	Eye Muscle Area		Angus Pure
400 Day Weight	Gestation Length	Rib Fat		Heifer Dairy Terminal
600 Day Weight	Calving Ease Direct	Rump Fat		Scan below for more details
Milk (Maternal)	Calving Ease Daughters	Retail Beef Yield		
Mature Cow Weight		Intramuscular Fat		

Details about the Angus Selection indexes can be found at:

<https://breedplan.une.edu.au/media/bqjbnnbh/using-new-zealand-angus-selection-indexes.pdf>

The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither Angus NZ nor ABRI oversee or audit the collection of this data.

More information, including EBV descriptions and how to use them, can be found in the **Using & Understanding TACE EBVs** booklet. Scan the QR code for more details.

Heritabilities of Traits in Angus Group TACE (TransTasman Cattle Evaluation)

Only part of the variation that we observe among animals is due to genetic differences. The majority of the variation is generally due to non-genetic factors such as differences in environment and nutrition.

The degree to which genetic differences influence performance varies from trait to trait. This is explained by differences in the “heritability” of the traits.

Growth and carcass traits tend to have moderate to high heritabilities (i.e. 20 to 60%), whilst maternal traits have low heritabilities (10% or lower).

Angus TACE takes into account the different degrees of heritability of various traits, and the known genetic relationships between the traits.

-  The amount of genetic influence in a trait.
-  The amount of environmental (non-genetic) influence in a trait.

VISUAL APPRAISAL IS VERY IMPORTANT FOR SELECTING BULLS

- **MASCULINE TRAITIS** - A strong head, jaw and thick neck indicate high levels of libido, testosterone and reproductive efficiency.
- **NECK LENGTH** - A thick necked animal matures and reaches puberty earlier and has more libido. A longer neck indicates a higher maintenance animal that is slower to reach puberty and rebreed.
- **HEART GIRTH** - Larger heart girth is an indicator of vigor and easy keeping ability. Small heart girth animals are more susceptible to stress, are higher maintenance and do not perform well.
- **STRUCTURAL SOUNDNESS** - Feet and bone- Hill country cattle cover large distances over rugged terrain so a strong skeleton is essential.
- **REPRODUCTIVE** - A tight sheath, good sized and shaped testicles are essential.
- **FLANK** - Deep flanked animals are easier keeping, have more meat in the rump and have more maternal and reproductive efficiency. Higher flanked animals tend to be higher maintenance and take longer to finish on grass.

LOOKING AFTER YOUR NEW BULL

1. Run your bull with a steer or cow as a companion.
2. Handle them quietly and don't rush them
3. Young bulls are still growing, so fresh feed and a little hay will maintain their growth pattern and help them to settle in.
4. Turiroa bulls are accustomed to being handled by Stockmen on horses and motorbikes and with dogs.
5. When the season is finished, the bull should be drenched and put away on good feed. Adequate feed will help stop fighting and help the bulls settle into their groups

INDEPENDENTLY INSPECTED

ALL BULLS IN THIS CATALOGUE HAVE BEEN INDEPENDENTLY INSPECTED

This Inspection service is offered by Angus New Zealand to breeding members as a form of quality assurance and indicates that the animal has passed inspection **on the specific day it was viewed**. The inspection is carried out by an approved Angus NZ Inspector, and animals of a minimum age which **pass** this inspections may assume an "Independently Inspected" status and may be promoted under the associated Angus NZ "Independently Inspected / AA Tick" logo (attached).

Inspections are carried out in accordance with the Angus NZ Inspection Manual 2011.

O.S.H.

Under the Occupation Health and Safety Act 1992 we are required to advise people of possible hazards.

1. Cattle Movements
2. Vehicles and Machinery
3. Cattle Yards: - Slippery Surface
4. Pavilion: - Seating

Disclaimer: Although every care has been taken to ensure accuracy, no responsibility is accepted for any error or omission that might be contained therein. The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither Angus NZ nor ABRI oversee or audit the collection of this data.

Complete was sold to Oregon Angus at our record breaking 2020 sale for \$86,000. He is a superbly sound, moderate framed bull with a great hindquarter and that good old fashioned spring of rib. He possesses a powerful head and jaw and a solid data set. His dam L094 has also left a stud bull to Ratanui for 40k at our 2022 Sale. We regret not using Complete heavier and will more than likely bring him into our AI program in the future. His sons are a chip off the old block.

The 68k Braveheart son. We were keen to utilize this bloodline as it is tried and proven. P26 has bred like himself leaving good early maturing types with that natural softness we like to see.

Lovely carcass on this Complete son with fats and IMF. He possess that square top that we like to see and for a bull of this dimension great walking ability as well.
Well worth a second look.

Oregon son that is really starting to come on now. Good fats. Will grow into a big strong sire.

What you put in today will pay dividends tomorrow.

By taking an integrated approach to the growth, immunity and energy of your young cattle, you're setting them on a path to become future high producers.

Talk to your vet or territory manager about young cattle health management today.

Your local territory manager

14 DAYS FREE COVER. NO BULL.

We want to ensure you get the very best cover on sale day and the best service every day after that. That's why we offer to insure your bull purchased at any **FMG Premier Bull Sale** for 14 days free* from the fall of the hammer.

Extend your cover. All bulls purchased at auction up to \$50,000 can be insured for 6.5% of the purchase price on a 12-month policy. You can choose to extend your 14 days free cover on the Purchaser Instruction and Insurance Slip. For terms less than 12 months, different rates apply.

So talk to your FMG Rural Manager about FMG Premier Bull Sales Insurance.

* Subject to standard underwriting criteria. Please note this is only a summary of FMG products and services and is subject to our specific product documentation. For full details, refer to the relevant policy wording at fmg.co.nz/livestockpolicy

We're here for the good of the country.

FMG Premier Bull Sale Insurance

What is FMG Premier Bull Insurance?

FMG provides automatic insurance for all bulls auctioned at an FMG Premier Bull Sale up to the value of \$50,000 for 14 days at no cost to the purchaser. For any bull purchased over \$50,000 talk to an FMG representative.

What is the length of cover?

You will automatically be insured for the specified bull for 14 days. You also have the option to extend the length of insurance to 12 months. Simply tick the “Extend your Premier Bull Insurance” option on the Purchaser Slip. The specified bull is then insured for the remaining period of 12 months at 6.5% of the purchase price. If you would like to discuss an alternative timeframe, please have a chat with your local FMG representative.

You don't have to pay today, FMG will invoice you for this additional cover.

What are the benefits?

- | | |
|-------------------------|--|
| ✓ Infertility | Cover if your specified bull has to be euthanised due to permanent infertility caused by certain accidents, disease, or illness. |
| ✓ Theft or death | We cover your specified bull for theft or death caused by certain accidents, disease, or illness (including while in transit anywhere in New Zealand). |
| ✓ Vet costs | We cover up to \$500 for treatment of your specified bull to prevent death. |

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

FMG Purchaser Instruction and Insurance Slip

This slip **MUST** be fully completed and handed to the Booking Clerk before leaving the sale.

^ Required to correctly identify you once cover is issued.
